PRESS KEY TO START GAME 🚀

LUNAR LANDER

- start screen, game screen and result screen
- the rocket has two possible results („game over" or „win"), which will show on the result page
- the game is played with a space bar, which controls the rocket's velocity - if you go too fast, the rocket crashes and the game is over, if you control the velocity and go slower, you win the game
- space theme, stars in the background, simple design
